

MUHAMMAD ZEESHAN

DATA SCIENTIST & AI/ML DEVELOPER

Lahore, Pakistan | +92 301 9843724 | rh3783901@gmail.com | zeeshanrana707.github.io | github.com/zeeshanrana707

PROFESSIONAL SUMMARY

Results-driven Data Scientist and AI/ML Developer with hands-on experience engineering predictive machine learning models, natural language processing (NLP) pipelines, and intelligent software architectures. Proven background completing a 3-month Data Scraper internship at Programmers Force optimizing automated ETL workflows with 99%+ schema reliability. Certified by DeepLearning.AI and IBM in data science methodologies and machine learning workflows.

TECHNICAL SKILLS

Languages: Python (Advanced), SQL (PostgreSQL, MSSQL, SQLite), Bash

NLP & Analytics: Text Preprocessing, Sentiment Analysis, EDA, Feature Engineering

Machine Learning: Scikit-learn, Pandas, NumPy, Gaussian Naive Bayes, Isolation Forest

Frameworks & Tools: Flask, RESTful APIs, Git, GitHub, Jupyter Lab, VS Code, Regex

PROFESSIONAL EXPERIENCE

Data Scraper Intern — Programmers Force

July 2025 – September 2025 (3 Months) | Remote

- Architected automated Python extraction pipelines to reliably collect unstructured data from dynamic web targets.
- Implemented anti-bot protocols (proxy rotation, user-agent pools, exponential backoff) with 99.2% extraction success.
- Engineered automated data validation scripts in Pandas, eliminating duplicate records and reducing downstream ETL latency by 80%.

Open-Source Software Collaborator — Orvix Repository

May 2026 – Present | Remote

- Contributed modular Python enhancements and bug fixes to the open-source Orvix codebase using standard Git workflows.
- Refactored modules for enhanced runtime execution performance and strict PEP 8 code compliance.

FEATURED PROJECTS

MediPredict — AI Disease Prediction System

98.77% Test Accuracy | Python, Scikit-learn, Flask

Engineered clinical triage classification engine using Gaussian Naive Bayes trained on multi-attribute symptom vectors. Features responsive Flask interface with sub-second diagnostic classification and dynamic search autocomplete.

AI Smart Banking & Real-Time Fraud Detection

Unsupervised ML | Python, Isolation Forest, Flask

Architected digital banking platform with embedded unsupervised machine learning to detect and quarantine fraudulent transactions in real-time, calculating anomaly scores based on velocity, amount, and time variance.

Smart Zoo Management & Operations System

<50ms Query Latency | Python, Flask, MS SQL Server

Designed an enterprise operations platform for veterinary care regimens, staff shifts, and automated feeding alerts backed by a normalized Microsoft SQL Server database and modular Flask RESTful API endpoints.

CERTIFICATIONS & ACCREDITATIONS

- Data Science Specialization — HEC-DLSEI 3.0 Program (Jan 2026)
- Tools for Data Science — IBM / Coursera (Jan 2026)
- AI For Everyone — DeepLearning.AI / Coursera (Jul 2025)
- Data Science Methodology — IBM / Coursera (Jan 2026)
- What is Data Science? — IBM / Coursera (Jan 2026)
